SEO SCORE	PASSED CHECKS	FAILED CHECKS	WARNINGS

COMMON SEO ISSUES

Meta Title Test	✔ The meta title of your page has a length of 63 characters. Most search engines will truncate meta titles to 70 characters. → MANUEL CALVO KAMPER | Composer - Producer - Guitarist - Teacher
Meta Description Test	✔ The meta description of your page has a length of 80 characters. Most search engines will truncate meta descriptions to 160 characters. → Professional musician offers guitar and applied theory lessons in Vienna/Austria
Google Search Results Preview Test	ⓘ MANUEL CALVO KAMPER | Composer - Producer - Guitarist - https://www.manuelcalvokamper.com Professional musician offers guitar and applied theory lessons in Vienna/Austria
Most Common Keywords Test	ⓘ There is likely no optimal keyword density (search engine algorithms have evolved beyond keyword density metrics as a significant ranking factor). It can be useful, however, to note which keywords appear most often on your page and if they reflect the intended topic of your page. More importantly, the keywords on your page should appear within natural sounding and grammatically correct copy. → guitar - 7 times → composer - 5 times → music - 5 times → teacher - 4 times → lessons - 4 times
Keywords Usage Test	✔ Congratulations! You are using your keywords in your meta-tags, which help search engines to properly identify the topic of your page. → Keyword(s) included in Title tag → Keyword(s) included in Meta-Description tag

Keywords Cloud Test	academy amplified applied ario artist astonishing aterciopelados austria bands basics calvo came career cargando caricare colombia composed composer computers considerably contact darío design deutsch different discography door ekhymosis ended español exist felt geladen germán guitar guitarist helped improve informatics insisted italiano jazz josé juanes kamper languages learned left lessons liceaga life manuel menu modern music musical musicality musicians obsession omidvar opened photos played prices private producer production projects references sanctuary school showed soon started story studied study studying styles sure sáenz teacher technique techniques tempted theory thought time times took translate university vicente videos vienna virtuosism wird worked world years
Heading Tags Test	✔ Congratulations! Your webpage contains headings tags. **H1 headings** → MANUEL CALVO KAMPER **H2 headings** → COMPOSER PRODUCER GUITARIST TEACHER
Robots.txt Test	✔ Congratulations! Your site uses a "robots.txt" file: https://www.manuelcalvokamper.com/robots.txt
Sitemap Test	✔ Congratulations! Your website has a sitemap file. → https://www.manuelcalvokamper.com/sitemap-17319.xml → https://www.manuelcalvokamper.com/sitemap-no-ssl-17319.xml
SEO Friendly URL Test	✔ Congratulations! All links from your webpage are SEO friendly.
Image Alt Test	✔ All of your webpage's "img" tags have the required "alt" attribute.

Inline CSS Test	✗ Your webpage is using inline CSS styles!
	
	HOW TO FIX
	
	It is a good practice to move all the inline CSS rules into an external file in order to make your page "lighter" in weight and decrease the code to text ratio.
	
	• check the HTML code of your page and identify all style attributes
	• for each style attribute found you must properly move all declarations in the external CSS file and remove the style attribute
	
	For example:
	
	`<!--this HTML code with inline CSS rule:-->`
	`<p style="color:red; font-size: 12px">some text here</p>`
	
	`<!--would became:-->`
	`<p>some text here</p>`
	
	`<!--and the rule added into your CSS file:-->`
	`p{color:red; font-size: 12px}`

Deprecated HTML Tags Test	✓ Congratulations! Your page does not use HTML deprecated tags.
Google Analytics Test	✓ Congratulations! Your webpage is using Google Analytics.
Favicon Test	✓ Congratulations! Your website appears to have a favicon.
JS Error Test	✓ Congratulations! There are no severe JavaScript errors on your webpage.
Social Media Test	✓ Congratulations! Your website is connected successfully with social media using: Facebook

SPEED OPTIMIZATIONS

HTML Page Size Test	✓ Congratulations! The size of your webpage's HTML is **4.85 Kb** and is under the average webpage's HTML size of **33 Kb**. Faster loading websites result in a better user experience, higher conversion rates, and generally better search engine rankings.
HTML Compression/GZIP Test	✓ Congratulations! Your webpage is successfully compressed using **gzip compression** on your code. Your HTML is compressed from **14.76 Kb** to **4.85 Kb** (**67% size savings**). This helps ensure a faster loading webpage and improved user experience.
Site Loading Speed Test	✓ Your website loading time is around **2.17 seconds** and this is under the average loading speed which is **5 seconds**.

Page Objects Test	✔ Congratulations, your page has fewer than **20 http requests**. A higher number of http requests results in a user's browser needing to request a large number of objects from your server, which will ultimately slow down the loading of your web page. HTML Pages: 1; CSS Files: 2; Scripts: 4; Images: 11; Flash Files: 0;
Page Cache Test (Server Side Caching)	✖ It does not appear that you are caching your pages. Cached pages serve up static html and avoid potentially time consuming queries to your database. It also helps lower server load by up to 80%. Caching most visibly benefits high traffic pages that access a database, but whose content does not change on every page view. Common caching methods include Alternative PHP Cache, Quickcache, and WP Super Cache (for Wordpress sites). Caching mechanisms also typically compress HTML, further reducing page size and load time. **HOW TO FIX** In order to pass this test you are advised to use a caching mechanism for your pages. There are three methods which can be used to caching your web pages: 1. **Alternative PHP caching** - Alternative PHP Cache (APC) is an open source framework which caches data using intermediate PHP code. Most web programmers who are familiar with the PHP programming language can easily set up Alternative PHP Cache for your site. 2. **Quickcache** - Quickcache is a lightweight page caching solution which was formerly known as jpcache. Quickcache caches the page output rather than compiling the PHP page, making it a superior version of page caching to the Alternative PHP caching. Quickcache can be quickly downloaded from their website and can reduce your page load time up to 80%. 3. **WP Super Cache** - If you have a Wordpress website, WP Super Cache can be installed within seconds and without no programming knowledge.
Flash Test	✔ Congratulations! Your website does not include flash objects (an outdated technology that was sometimes used to deliver rich multimedia content). Flash content does not work well on mobile devices, and is difficult for crawlers to interpret.
CDN Usage Test	! Your webpage is not serving all resources (images, javascript and css) from CDNs. **HOW TO FIX** In order to pass this test you are advised to use a CDN service. A Content Delivery Network (CDN) is a globally distributed network of web servers that allows a quick transfer of assets and provides high availability and high performance. The primary benefits of using a CDN service are: • Improving website loading times • Reducing bandwidth costs • Increasing content availability and redundancy • Improving website security
Image Caching Test	✔ Congratulations! Your website is using cache headers for your images and the browsers will display these images from the cache.

JavaScript Caching Test	✔ Congratulations! Your website is using cache headers for all JavaScript resources.
CSS Caching Test	✔ Congratulations! Your website is using cache headers for all CSS resources.
JavaScript Minification Test	✔ Congratulations! Your website's JavaScript files are minified!
CSS Minification Test	✔ Congratulations! Your webpage's CSS resources are minified.
Nested Tables Test	✔ Congratulations, your page does not use nested tables. This speeds up page loading time and optimizes the user experience.
Frameset Test	✔ Congratulations! Your webpage does not use frames.
Doctype Test	✔ Congratulations! Your website has a doctype declaration: → <!DOCTYPE html>
URL Redirects Test	✔ Congratulations! Your URL doesn't have any redirects (which could potentially cause site indexation issues and site loading delays).

SERVER AND SECURITY

URL Canonicalization Test	✔ https://www.manuelcalvokamper.com and https://manuelcalvokamper.com resolve to the same URL.
HTTPS Test	✔ Your website is successfully using HTTPS, a secure communication protocol over the Internet. → Security state: secure → Certificate issuer: Let's Encrypt Authority X3 → Valid until: Aug 06, 2019
Safe Browsing Test	✔ This site is not currently listed as suspicious (no malware or phishing activity found).
Server Signature Test	✔ Congratulations, your server signature is off.
Directory Browsing Test	✔ Congratulations! Your server has disabled directory browsing.
Plaintext Emails Test	✔ Congratulations! Your webpage does not include email addresses in plaintext.

Media Query Responsive Test

Your website is not using media queries. You should consider using this technique in order to implement responsive design functionalities.

HOW TO FIX

Media queries allow you to style elements for specific devices (smartphones, tablets, desktop computers) by using attributes like width, height, resolution, aspect ratio, orientation or color. By using media queries, presentations can be tailored to a specific range of output devices without changing the content itself.

Example:

```
<link rel="stylesheet" media="screen and (min-width: 480px) and (max-width: 960
px)"
href="480-960.css" />

<!-- OR -->
@media screen and (min-width: 480px) and (max-width: 960px) {
   #header {
      display: none;
   }
}
```

A **@media** rule specifies the target media types of a set of statements. In the example above, we are specifying the media type **screen**. The **max-width** and **min-width** features are telling the browser that at any screen size larger than 480px, but smaller than 960px, hide any elements with **id="header"**.

Mobile Snapshot Test

ADVANCED SEO	
Structured Data Test	✔ Congratulations! Your website is using HTML Microdata specifications in order to markup structured data.
Custom 404 Error Page Test	✔ Congratulations, your website is using a custom 404 error page. By creating a custom 404 error page, you can improve your website's user experience by letting users know that only a specific page is missing/broken (and not your entire site), providing them helpful links, the opportunity to report bugs, and potentially track the source of broken links in your site.
Noindex Tag Test	✔ Your webpage does not use the noindex meta tag. This means that your webpage will be read and indexed by search engines.
Canonical Tag Test	✔ Your webpage is using the canonical link tag. This tag specifies that the URL: https://www.manuelcalvokamper.com is preferred to be used in search results. Please ensure that this specification is correct, as canonical tags are often hard-coded and may not always reflect the latest changes in a site's URL structure. → <link href="https://www.manuelcalvokamper.com" rel="canonical"/>
Nofollow Tag Test	✔ Your webpage does not use the nofollow meta tag. This means that search engines will crawl all links from your webpage.
Disallow Directive Test	✔ Your robots.txt file disallow the search engines access to some parts of your website. You are advised to check carefully if the access to these resources or pages must be blocked. → Disallow: /sanctuary-lv1/ → Disallow: /sanctuary-lv2/ → Disallow: /sanctuary-lv3/ → Disallow: /sanctuary-lv4/ → Disallow: /de/heiligtum-lv1/ → Disallow: /de/heiligtum-lv2/ → Disallow: /de/heiligtum-lv3/ → Disallow: /de/heiligtum-lv4/ → Disallow: /es/santuario-lv1/ → Disallow: /es/santuario-lv2/ → Disallow: /es/santuario-lv3/ → Disallow: /es/santuario-lv4/ → Disallow: /it/santuario-lv1/ → Disallow: /it/santuario-lv2/ → Disallow: /it/santuario-lv3/ → Disallow: /it/santuario-lv4/ → Disallow: /html/ → Disallow: /new/ → Disallow: /media/ → Disallow: /projects/ → Disallow: /discography/ → Disallow: /videos/ → Disallow: /lessons/ → Disallow: /prices/ → Disallow: /references/ → Disallow: /contact/ → Disallow: /de/projekte/ → Disallow: /de/diskographie/ → Disallow: /de/videos/

→ Disallow: /de/unterricht/
→ Disallow: /de/preise/
→ Disallow: /de/referenzen/
→ Disallow: /de/kontakt/
→ Disallow: /es/proyectos/
→ Disallow: /es/discografia/
→ Disallow: /es/videos/
→ Disallow: /es/clases/
→ Disallow: /es/precios/
→ Disallow: /es/referencias/
→ Disallow: /es/contacto/
→ Disallow: /it/progetti/
→ Disallow: /it/discografia/
→ Disallow: /it/video/
→ Disallow: /it/lezioni/
→ Disallow: /it/prezzi/
→ Disallow: /it/referenze/
→ Disallow: /it/contatto/
→ Disallow: /projects.php/
→ Disallow: /discography.php/
→ Disallow: /videos.php/
→ Disallow: /lessons.php/
→ Disallow: /prices.php/
→ Disallow: /references.php/
→ Disallow: /contact.php/
→ Disallow: /de/projekte.php/
→ Disallow: /de/diskographie.php/
→ Disallow: /de/videos.php/
→ Disallow: /de/unterricht.php/
→ Disallow: /de/preise.php/
→ Disallow: /de/referenzen.php/
