Notes

Definition
Any sound that can be individually distinguishable.

Names
Depending on the culture, notes carry different names.
Here I'll show you three notation possibilities , although we're only gonna use the English one, simply because it's the most practical of all, plus it's the most used all over the world.

In the romance languages	**Do**	**Re**	**Mi**	**Fa**	**Sol**	**La**	**Si**
In English	**C**	**D**	**E**	**F**	**G**	**A**	**B**
In the germanic languages	**C**	**D**	**E**	**F**	**G**	**A**	**H**

The letter **B** also exists in the germanic notation, but it appears as an accidental between **A** and **H**.
